Regular TRASH DAY IS STILL MONDAY's and  
only put out the day of  
Remember – NO Trash cans – bags only

## Manager's Korner

July 2018

Tony Toscano

Good Day to all. Mother Nature giveth and taketh away. Just 30 days ago we were thanking Mother Nature for all the rains and the color and health she brought to our plants and lawns. Now we are begging for the rains. Start doing your best rain dance. We need all the help we can get.

As with every year my wife's grandkids will be coming down for a visit starting 6/27. This year the "know it all" 13 yr. old does not want to come down with his "baby" 8yr old brother, so they will visit separately with us going back in-between their stays for a week 7/12-7/17. By the time the little one leaves it will be early August. Looking forward to the family visit and maybe looking for a place in NH for my retirement years. And of course, the perks of having refrigerators full of beer and the taste of Northern home cooking.

I am still out of the office quite a bit with Scott still learning. He is getting an education on what you can run into on this job, which can take you places even Star Trek dared not venture hahaah. Until things settle down a bit, please be patient if I am not around the office. Best is to call me to get my office schedule rather than taking the trip for nothing.

### Updates on the park projects:

**Road Seal** – All-Phase Paving & Sealing Co. seal-coated the roads with a 2 coat Gem Seal polytar – an excellent product according to the experts. I recently took a 2-hour class on road maintenance and this product was highly recommended. 16K job

Before installing any sealer, we received the spec sheet on the mixture for the raw product from the manufacturer Standards allow to mix up to 3 lbs of sand per gallon of raw material- All-Phase mixed only 1 lb per gallon. Standards call for end user to add an additional 10% water to the product to dilute – All-Phase added none. We received an excellent product. Workers could have been a bit more professional looking, but job was well done.

### Roof replacement for mailroom and garage

Kontos Roofing – a local Tarpon Springs roofing company will be doing the garage and mailroom roofs – colors have been picked – in the neutral grey family just in case the colors of the clubhouse exterior trim and paint get changed in the future

**Stumps**- we have ground down 32.

### Clubhouse Generator- still on the agenda

-we are going to pick up this conversation again with our electrician and explore costs

### Future items:

**Pressure washing** sidewalks is next

**Rental of a floor scrubber** to clean the clubhouse floors – anyone with experience n this will be greatly appreciated

**Still must track down leaks** in the City Water system – this is an ongoing project

**Trying to get our lawns to come back** after the dry weather and some shutdown of the wells during the seal coating  
I am sure there is something else before the summer is over, but it slips my mind right now

### **Worth Repeating**

As mentioned with over 50% of our residents leaving, we have less eyes to keep in touch with what is happening around the property. This is very important since we are the only line of defense against scam artists that come into our property. Believe me they will be around and knocking. Please just a friendly "no thank you" will do and immediately report it to the office. Try to get the color and make of the vehicle and a plate # if possible - but in no way engage in conversation. We will take care of that. With regard to those who know on doors as well as those who call you on the phone **IF YOU HAVE NOT REQUESTED INFORMATION OR A SERVICE, I DO NOT CARE HOW CONVINCING THEY SOUND, DO NOT TALK TO THEM!!!**

### **Homes for Sale**

There are only 4 homes for sale as far as I know. Sales for the latter part of 2017 and early 2018 have been great. Compliments to all those who maintain their properties to the Stonehedge satisfaction.

Unit 225 - \$67.5K    191- 60K For Sale by Owner  
Unit 236 -Listed thru Re-Max at \$69.9K  
Also, unit 84 listing thru an outside realtor - inquire direct at home for info

I do not need to remind everyone to be safe on the road. If there is an idiot out there - let him be - proving a point that someone is an idiot on the road will not change that idiot into a genius. Enjoy your ride and let him or her find their grave someplace else.

Laugh when you can  
Apologize when you should  
Do not dwell on what you cannot change  
Let go of what you cannot control  
Take charge of what you can.  
Safe travels, enjoy family, love life.

**TONY**

**IMPORTANT: SEAL COATING OF ROADS should be completed by the time of this publication**  
**If not, then we had rain delays that pushed the schedule to July for a day or 2**  
**Please check bulletin boards for any updates**  
**ANY QUESTIONS CALL OR STOP BY THE OFFICE**

**PS: Great Job by our residents in complying with the restrictions and disruptions during this project.**

# Happy Birthday

## JULY BIRTHDAYS

- 2 - Marianne Pishkur
- 4 - Victor Unruh, Terry W. Ellingson
- 6 - Judith Scott, Elizabeth Barth,  
Gus Ayers
- 7 - Barbara Hanton, August Jesse
- 8 - William Welker

# EXTREME HEAT

Extreme Heat often results in the highest number of annual deaths among all weather-related hazards. In most of the United States, extreme heat is defined as a long period (2 to 3 days) of high heat and humidity with temperatures above 90 degrees. In extreme heat, evaporation is slowed and the body must work extra hard to maintain a normal temperature. This can lead to death by overworking the human body. Remember that:

- Extreme heat can occur quickly and without warning.
- Older adults, children, and sick or overweight individuals are at greater risk from extreme heat.
- Humidity increases the feeling of heat as measured by a heat index.

## **IF YOU ARE UNDER AN EXTREME HEAT WARNING:**

- Find air conditioning.
- Avoid strenuous activities.
- Watch for heat illness.
- Wear light clothing.
- Check on family members and neighbors.
- Drink plenty of fluids.
- Watch for heat cramps, heat exhaustion, and heat stroke.
- Never leave people or pets in a closed car.

## **HOW TO STAY SAFE WHEN EXTREME HEAT THREATENS**

### **WHAT TO DO NOW: Prepare**

- Find places in your community where you can go to get cool.
- Keep your home cool by doing the following:
  - Cover windows with drapes or shades.
  - Weather-strip doors and windows.
  - Use window reflectors, such as aluminum foil-covered cardboard, to reflect heat back outside.
  - Add insulation to keep the heat out.
  - Use attic fans to clear hot air.
  - Install window air conditioners and insulate around them.
- Learn to recognize the signs of heat-related illness.
- Find places with air conditioning. Libraries, shopping malls, and community centers can provide a cool place to take a break from the heat.

## WHAT TO DO DURING: Be Safe

- Never leave a child, adult, or animal alone inside a vehicle on a warm day.
- Find places with air conditioning. Libraries, shopping malls, and community centers can provide a cool place to take a break from the heat.
- If you're outside, find shade. Wear a hat wide enough to protect your face.
- Wear loose, lightweight, light-colored clothing.
- Drink plenty of fluids to stay hydrated. If you or someone you care for is on a special diet, ask a doctor how best to accommodate it.
- Do not use electric fans when the temperature outside is more than 95 degrees, as this could increase the risk of heat-related illness. Fans create air flow and a false sense of comfort, but do not reduce body temperature.
- Avoid high-energy activities.
- Check yourself, family members, and neighbors for signs of heat-related illness.

## RECOGNIZE AND RESPOND

Know the signs of heat-related illness and the ways to respond to it:

- **HEAT CRAMPS**
  - **Signs:** Muscle pains or spasms in the stomach, arms, or legs
  - **Actions:** Go to a cooler location. Remove excess clothing. Take sips of cool sports drinks with salt and sugar. Get medical help if cramps last more than an hour.
- **HEAT EXHAUSTION**
  - **Signs:** Heavy sweating, paleness, muscle cramps, tiredness, weakness, dizziness, headache, nausea or vomiting, or fainting
  - **Actions:** Go to an air-conditioned place and lie down. Loosen or remove clothing. Take a cool bath. Take sips of cool sports drinks with salt and sugar. Get medical help if symptoms get worse or last more than an hour.
- **HEAT STROKE**
  - **Signs:** Extremely high body temperature (above 103 degrees) taken orally; red, hot, and dry skin with no sweat; rapid, strong pulse; dizziness; confusion; or unconsciousness
  - **Actions:** Call 911 or get the person to a hospital immediately. Cool down with whatever methods are available until medical help arrives.

## Sun's Out, Fun's Out

An active mind is a healthy mind. Give your brain a good workout by seeing how quickly you can complete this month's puzzle.

### ACROSS

4. It's always this in Philadelphia.
6. On June 21, this is at its maximum.
7. The hotter it gets, the more important this is.
8. It's what makes the air feel sticky.
11. The unofficial fresh-squeezed beverage of summer.
12. It's powered with pedals.
13. If it's not this, it's the humidity.

### DOWN

1. Taking a long walk on the trail.
2. Wearing repellent can prevent these bites.
3. A mindful stretching practice.
5. These rays can cause skin damage even on

- cloudy days.
9. Straight from the garden.
  10. When walking in parks, please stay on the \_\_\_\_\_.

ACROSS: 4. sunny, 6. hydration, 7. daylight, 8. humidity, 11. lemonade, 12. bicycle, 13. heat.  
DOWN: 1. hiking, 2. insect, 3. yoga, 5. ultraviolet, 9. fresh, 10. path.

**So sorry, but we our unable to provide a calendar from the road (our calendar software won't run on the laptop that we took north). We'll try to figure out an answer for next month, but the good news is, other than the days of the week, nothing much will be changing, and we'll let you know of events in the body of the bulletin. We hope you all are having a wonderful summer!**
